

PROVIDER ADVISORY #2026-009
APD PROVIDER SEARCH

EFFECTIVE DATE: MAY 8, 2026

The Agency for Persons with Disabilities (APD) is excited to announce a new web-based APD Provider Search. This APD Provider Search is a new resource to allow individuals to search for APD Licensed settings across the state. Individuals will now be able to use the new searchable database to search and gather demographic information for APD Licensed settings. It is now easier than ever for individuals, families, and caregivers to locate APD Licensed settings and learn more about available providers in their area.

Please find the Provider Search here: <https://apd.myflorida.com/resources/providersearch.htm>.

Initially, the APD Provider Search will only include licensed settings and programs. In the near future, all APD providers will be searchable through this online tool.

APD Licensed provider information will be collected from the provider iConnect profiles. Provider profiles will need to be up to date in the iConnect system. If there are any changes to your information, please make sure your information is updated in APD iConnect.
